## Introduction

I am a postgraduate researcher at the Hong Kong University of Science and **Technology** (HKUST). My research goal is to develop learning algorithms and techniques that could endow machines and systems with greater autonomy and intelligence to acquire the skills for executing complex tasks. I am interested in the intersection of multi-agent systems, reinforcement learning, game theory, robotics, vision, and machine learning. Currently, I focus on solving multi-agent reinforcement learning problems under scalability and reliability consideration.
